BIOGRAPHY

The Radioactive is a fission group. physical phenomenon where the core of heavy rock is split by punk by releasing a very important radioactive energy.

The Radioactive was formed in 2011 by its singer, Oscar. His sharp melodies ranging from Reignwolf blues to Fidlar punk merged with Neil's power on drums and Arthur's craziness on bass.

The Radioactive unleashes and provokes the Parisian scene with more than 50 concerts to its credit (la cigale, Bus Palladium) to promote the two EPs released in 2013 and 2015. In 2019,

The group decides to end this period with the release of the mini album "A Matter of Time" grouping together their most popular songs of the time such as "8 'o'clock" or "Trabant".

It is finally in 2020 that the group decides to take a new turn by recording "Last Generation". An album with multiple influences with the ambition to rewrite the laws of rock'n'roll.

PRESS

"Diversity, inventiveness, talent, judiciously arranged guests, make this "Last Generation" an attractive album"

Ahasverus

"Last generation is a breath of life, a cry of revolt against the ambient gloom. The group, which has the particularity of being explosive on stage"

LITZIC

"The Radioactive, with this album Last Generation, are going to be talked about, it's more than acquired!"

Sensation Rock

"The Radioactive also wants to be the engine of a celebration that should never go away"

Longueur D'onde
